DAFTAR TABEL ............................................................................................................. xiv
DAFTAR LAMPIRAN ..................................................................................................... xv

BAB 1 PENDAHULUAN .................................................................................................. 1
A. Latar Belakang .......................................................................................................... 1
B. Rumusan Masalah ................................................................................................... 3
C. Tujuan Penelitian ..................................................................................................... 3
    1. Tujuan Umum ....................................................................................................... 3
    2. Tujuan Khusus ................................................................................................... 3
D. Manfaat Penelitian .................................................................................................. 3

BAB II TINJAUAN PUSTAKA ....................................................................................... 5
A. Konsep Asma .......................................................................................................... 5
    1. Definisi Asma ...................................................................................................... 5
    2. Jenis Asma ......................................................................................................... 5
    3. Etiologi Asma .................................................................................................... 7
    4. Gejala Asma ..................................................................................................... 9
    5. Patofisiologi Asma ............................................................................................ 9
    6. Penatalaksanaan Asma ..................................................................................... 10
    7. Komplikasi Asma ............................................................................................ 11
B. Arus Puncak Ekspirasi .......................................................................................... 11
    1. Definisi Arus Puncak Ekspirasi ................................................................. 11
2. Faktor Yang Mempengaruhi Nilai Arus Puncak Ekspirasi ..........11
3. Cara Pengukuran Arus Puncak Ekspirasi ................................12

C. Senam Asma ........................................................................15
  1. Definisi Senam Asma ......................................................15
  2. Manfaat Senam Asma ......................................................15
  3. Langkah-langkah Senam Asma ........................................15

D. Pengaruh Senam Asma Untuk Menurunkan Kambuhan Asma
   Terhadap Penderita Asma Bronchial .................................31

BAB III METODE PENELITIAN ..............................................32
  A. Rancangan Penelitian ....................................................32
  B. Subyek Penelitian ........................................................32
  C. Definisi Operasional ......................................................33
  D. Tempat dan Waktu Penelitian .........................................33
  E. Pengumpulan Data .........................................................33
  F. Cara Pengolahan Data ....................................................34
  G. Etika Penelitian ..........................................................34

BAB IV HASIL PENELITIAN DAN PEMAHASAN ......................36
  A. Gambaran Umum Lokasi Penelitian .................................36
  B. Gambaran Umum Responden .........................................36
  C. Hasil Penelitian ..........................................................37
  D. Pembahasan ...............................................................38
     1. Arus Puncak Ekspirasi sebelum dilakukan senam asma ..........38
     2. Arus Puncak Ekspirasi sesudah dilakukan senam asma ........39
     3. Perbedaan hasil pengukuran Arus Puncak Ekspirasi sebelum
dan sesudah dilakukan senam asma ..................................40
  E. Keterbatasan ....................................................................41

BAB V HASIL PENELITIAN DAN PEMAHASAN .......................42
  A. Kesimpulan ...............................................................42
  B. Saran ...........................................................................42
